## About This Game

Your job as the architect and developer is to build world-famous skyscrapers that will be the envy of the entire city, masterpieces of art and engineering. But a skyscraper is more than just steel and glass, it's an intricate ecosystem, full of people that live and work in the building. They become a complex machine that needs your steady hand to keep it running smoothly and efficiently.

From the moment you break ground, every decision rests with you. As the architect you must coordinate the construction of everything - every wall and wire, every office and apartment. As the building owner you must keep your tenants happy - and paying rent on time. As a savvy developer you must keep an eye on the bottom line and invest in the future. Succeed and you will reap the rewards of a prestigious address where everyone will clamor to live and work. Fail and you will watch tenants leave in disgust, taking their business elsewhere and leaving your reputation in tatters.

Will you create an exclusive office highrise that attracts business leaders from around the world? Will you construct luxury apartments in the sky, penthouses for the elite and playgrounds for the famous? Perhaps greed will get the better of you and you'll build a tenement building that trades tenant happiness for loads of cash? All these choices and more are yours. Success is entirely in your hands.

## **Features**

- Deep and complex simulation of a modern skyscraper.
- Huge variety of tenants with their own unique characteristics, from restaurants, to offices, retail stores, or residential apartments.
- Open sandbox play with several difficulty levels and starting conditions allowing you to build your dream skyscraper towering above the surrounding city.
- Campaign mode that tests your skill at building a successful highrise in challenging scenarios.
- Test your management mettle by keeping up with your buildings diverse population and their ever-increasing demands.
- Hire specialized consultants to increase your building's curb appeal, operational efficiency, and pull with city hall.

I'm not sure how much I can recommend this game ...

It is obviously inspired by the classic SimTower, but despite Project Highrise being 22 years younger, it isn't all that much better. In fact, the game has some rather serious flaws. Like the fact that the elevators, possible the most important feature of a tower, have unlimited capacity. So crowd and traffic control, something that was a great challenge in SimTower, is completely absent in Project Highrise. There's just no challenge.

However, there are things in Project Highrise that are quite a bit more fun than in SimTower. The tower management (utilities and different needs) is much deeper and really the true challenge of the game!

I did enjoy Project Highrise quite a bit in the end. Once you know what to expect you'll find yourself trapped into trying to get an efficient tower going. If you enjoy games like SimTower, you'll most likely will enjoy Project Highrise. Just don't expect a better game and maybe wait for a sale.
